

# Invasive Plants of Wisconsin's Wetlands: Identification and Management

February 4, 2006; Lussier Family Heritage Center, Madison, WI

~ A Conference of the **Invasive Plants Association of Wisconsin** ~

*Co-Sponsored by Dane County Parks & Lussier Family Heritage Center*

*This conference will feature practical information for wetland managers of Wisconsin who are combatting invasive plants. Apart from species-specific presentations emphasizing identification and control, participants can also attend one of two workshops, join field trips, visit multiple displays and vendors, and attend the Annual IPAW Meeting. Field trips take place in the afternoon on February 3; see details at left.*

**Lussier Family  
Heritage Center**

## Saturday, February 4

8:00 Registration; Displays and Vendors Open

9:00 Concurrent Sessions

*1-hour per species. Multiple authorities will highlight identification, control tools and techniques. Audience can participate during panel discussion at end of each session.*

- ❖ Giant Reed / *Phragmites*
- ❖ Cattails (narrow-leaved and hybrid)
- ❖ Reed Canary Grass
- ❖ Glossy Buckthorn
- ❖ Purple loosestrife
- ❖ Future Wetland Invasives

12:00 Lunch and IPAW Annual Meeting

1:00 Workshops

### ❖ Herbicide Selection, Safety and Usage

*UW-Extension experts provide detailed information on safe and effective herbicide usage in all settings, with additional focus on wetland applications.*

### ❖ Cooperative Weed Management Areas

*Future success lies in the creation of these local coalitions that integrate weed managers across jurisdictional boundaries for sharing resources and funding.*

4:00 Displays and Vendors Open

***For more conference details, see [www.ipaw.org](http://www.ipaw.org)***

*The mission of the Invasive Plants Association of Wisconsin is to promote better stewardship of the natural resources of Wisconsin by advancing the understanding of invasive plants and encouraging the control of their spread.*
